

We are proud to say we have provided clean, efficient heat to a huge variety of yoga studios from Sweden to Hawaii and across the U.S. We offer a variety of heaters and thermostats for the hot yoga market. This guide will explain the features and benefits of each and get you on your way to providing hot yoga classes for your students! We have had excellent feedback from our yoga studio customers and hope you consider Heating Green for your yoga studio project.

Radiant Infrared Heat Benefits

Before we get into the specifics of each product, it's important to understand some general features and benefits of infrared radiant heat.

- The occupants and objects in the room are heated first, rather than the air. This uses less energy, saves you money and helps promote a healthier environment.
- Products require little-to-no maintenance and ordinarily last the life of the building.
- Our heaters are silent and do not stir dust, germs, or emit odor, and no usable space is taken up.

Hot Yoga Benefits

- Heavy sweating flushes toxins from the skin and yoga postures help wring out the internal organs. Combining yoga with heat is an excellent way to rid the body of toxins.
- Heat increases circulation. This makes your heart pump harder and encourages weight loss.
- Heat literally warms your muscles up. This can help increase one's flexibility as each student is able to dive deeper into the yoga postures.

How many heaters do you need?

- There are many factors that determine how many heaters you will need to get your space up to your desired temperature.
- To name a few these include insulation R values, ceiling height, number of outside-facing walls and whether you will be using the heaters as a primary or supplementary heat source.
- Typically, we recommend 15 watts of energy for every square foot of space in your studio.
- For a solution custom tailored to your space, you should fill out the yoga studio quote available at <http://www.heatinggreen.com/get-a-quote/yoga-studio-quote/>

heating green[®] Yoga Heating Products

Although many of our products look similar, they each have their own features and benefits, which will suit different applications. This guide will go over some of those and help you determine which heaters will work best for your space.

Marley Go-Anywhere Panel

Due to its wide variety of voltages and ability to mount to a t-bar ceiling, the Marley Go-Anywhere Panel is our most popular choice among studio owners.

- **Price Range:** \$199-\$315 (USD)
- **Mounting options:** This panel can be mounted to a T-bar ceiling, suspended with wire or chain, or surface or flush mounted to drywall with an additional frame.
- **Voltage:** 120, 208, 240 or 277. (Note: these panels are designed to be hard-wired and do not plug in to a standard outlet).
- **Color Options:** Birch white (stock color), can be painted with water-based interior paint. Additional colors available upon request.
- **Warranty:** 5 year factory warranty.

Ducoterra Sola-Ray II Panel

The Sola-Ray II is a good choice for people with 8-to-10 foot high drywall ceilings. At just 1/2 inch thick, these are the thinnest panels in the industry that will mount flat against the ceiling surface.

- **Price Range:** \$220-\$530 (USD)
- **Mounting options:** This panel can be mounted flat against any ceiling. It can also be suspended with a chain or wire.
- **Voltage:** 120 or 240. Custom voltages upon request. (Note: these panels are designed to be hard-wired and do not plug in to a standard outlet).
- **Color Options:** Powder-coated white (stock color), can be painted with water-based interior paint.
- **Warranty:** 20 year factory warranty, the longest in the industry!

heating green[™] Yoga Heating Products

Cove Heating Panels

Our cove heaters are very versatile because of their ability to mount on the wall. This makes them ideal for rooms with high ceilings, which are otherwise hard to heat.

- **Price Range:** \$360-\$635 (USD)
- **Mounting options:** This panel can be mounted on the wall at or above a height of 6 feet. It can also be ceiling mounted.
- **Voltage:** 120, 208, 240 or 277. (Note: these panels are designed to be hard-wired and do not plug in to a standard outlet).
- **Color Options:** Stock colors are white and beige, custom colors (brown & black) are available with a minimum order of 20 heaters.
- **Warranty:** 10 year warranty. Pro rated after 5 years.

Infratech Quartz Heaters

The Infratech Quartz Heaters are a good value in terms of watts per dollar. They are UL listed and safe for indoor and outdoor use. They heat up quickly and are great for studios.

- **Price Range:** \$389-\$649 (USD)
- **Mounting options:** This heater can be mounted flat against any wall or ceiling. It can also be flush mounted with a kit.
- **Voltage:** 120 or 240. (Note: these panels are designed to be hard-wired and do not plug in to a standard outlet).
- **Color Options:** Stainless steel (stock). Custom colors are powder coated white, beige, almond, bronze and black.
- **Warranty:** 1 year.

Portable Plug-In Heater

This portable plug-in heater from Crown Verity is an excellent choice for a personal hot yoga studio due to its versatility and ease of use. It comes with a stand and can easily be moved from room to room or even outside to your deck or patio.

- **Price Range:** \$295-\$425 (USD)
- **Mounting options:** This heater can be mounted on a stand, allowing for the user to easily move it from room to room. It can also be mounted on a wall or ceiling.
- **Voltage:** 120 volts, designed to plug in to any standard outlet.
- **Color Options:** Aluminum

Prestyl Plug-In

These panels can mount to a wall ceiling via included brackets. They have a slim profile and don't take up useable space. These heaters come with a cord, which can be plugged in to any standard outlet. They can also be hardwired.

- **Price Range:** \$353-\$595 (USD)
- **Mounting options:** This heater can be mounted to the wall or ceiling via included brackets
- **Voltage:** 120, 208, 240 or 277 volts, (120 volt model is designed to plug in to any standard outlet).
- **Color Options:** Black or White. Panels are also available with stock & custom art options. For more info please visit <http://www.heatinggreen.com/product/artistic-panel-heaters/>
- **Warranty:** 5 years
