Signature Series Glass Heaters  
by Heatstorm

DECORATIVE RADIANT HEATERS  
WHEN DESIGN MEETS COMFORT

## The new generation of radiant heaters has arrived!

With stylish, ultra slim design and high efficiency, Signature Series radiators by Heatstorm provide all the benefits of radiant heating in a pleasing

and convenient wall mounted solution.

Designed with both sides of wonderful coloured tempered glass and trimmed by a thin brushed stainless frame as a statement of design, they are equally suitable for the home or office.

With the chromed and polished drying rails that you can fix anywhere, Signature Series radiators by Heatstorm become towel dryers for a stylish

bathroom solution (choose as many as you need).

The whole surface is heated to an even temperature and emits a natural sort of infrared heat very close to the human body's heat.

**Signature Series Radiant Glass Heater by Heatstorm** model, "4 Elements" design,  
collection Gourmet Kitchen

### When radiant heating meets comfort

Thermal comfort is an essential aspect of well-being. This is the reason why we have been focusing our expertise on coming up with innovative and efficient thermal solutions to improve comfort standards.

There are several key benefits to the **Signature Series Radiant Glass Heaters by Heatstorm:**

- It guarantees a real sensation of comfort to the occupants, no matter at what height it's been installed
- Optimal inside air quality: no air or carbon dust mixing
- Imperceptible: no noise, no smell...
- Discreet: allow you to save significant room in your household
- Economical: no maintenance

# TECHNICAL FEATURES

## TECHNOLOGY

**Signature Series radiators by Heatstorm** were created on the very unique technology of far infrared radiation. Its singularity is to heat bodies without heating the air. It reproduces a gentle and unvarying heat within the room for an optimal sensation of comfort.

### ■ Heating Technology

While convection systems heat the air within your household, radiant heating emits infrared radiations directly towards the bodies, furniture and walls that will then themselves radiates the heat. Once those masses are loaded with energy, they will then gradually release it to continuously warm up the space. This is a sun-like technology. Thermal comfort is perfect.

- All the masses of your building (floors, walls, ceilings) and all the masses of your furniture (sofas, tables, closets, beds, desks, chairs, kitchen appliances...) are heated without any risk,
- They gather the heat in order to then release it continuously all over the room,
- **Signature Series Glass Heaters by heatstom** enable to quickly reach comfortable temperature levels and release a continuous and homogeneous heat

### ■ A healthy radiant heating system

The far infrared system does not generate any electromagnetic fields like the ones emitted by mobile phones or computers. Actually, this natural energy is constantly emitted by the human body. It has nothing to do with UV radiations or atomic energy. From a medical point of view, it is proved to be a great stimulant for blood microcirculation and tissue regeneration.

### ■ Less power, better performance !

While convection heating sucks the cold air up to turn it into warm air, **Signature Series Radiators by Heatstorm** directly heat the bodies. As the air is a natural insulation, it takes a lot of energy to process its temperature, even for as little as one degree. As the **Signature Series** radiators by Heatstorm operate on a complete different process and do not intend to transform the air temperature, the energy required to reach the ideal temperature is almost divided by

two.

Regarding productivity, a single 750W **Signature Series** radiator by Heatstorm will allow you to reach performances similar to a 1,500W electric convector while providing the most comfortable heat.

### ■ Reduction of the heating time

The **Signature Series** heaters by Heatstorm deliver some of the energy they generate to walls, floors and ceilings that then start to radiate themselves. Thanks to that process, the duration of time during which the heat is actually on are considerably reduced. Your heating bill will greatly benefit from that, allowing up to 30% of energy savings. Also, this low temperature radiation respects the standard humidity levels to secure an optimum quality of the air in your household.

### ■ HD printing

*A breathtaking quality of image*

Thanks to our innovative printing technology, **Signature Series** radiators by Heatstorm incorporate high definition designs directly printed behind the glass panel for an exclusive finish.

### ■ Heating system

Our heaters are made out of two main glass panels. In between those two panels, there is a double insulated heating film that covers consistently all the heating surface. This heating film is unperishable. Also, a thermal regulator is included for real-time control of the indoor temperature and to avoid any risk of overheating.

### ■ Thermal Inertia

Thanks to the radiations of the **Signature Series** glass heater by Heatstorm, the masses that have been warmed up keep on radiate themselves even if the heaters temperature lowers down or shuts off.

## ▮ I CHOOSE AMONG SEVERAL OPTIONS

### - According to the surface area of my room

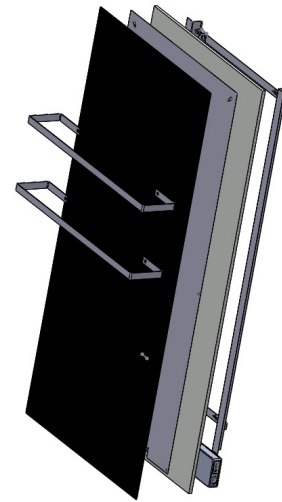

4 formats to be positioned vertically or horizontally in order to adapt to your need.

DIMENSIONS	PUISSANCE	SUPERFICIE
16'' x 48 in	500W	10 m <sup>2</sup>
16'' x 72 in	750W	15 m <sup>2</sup>
24'' x 48'' in	750W	15 m <sup>2</sup>
24'' x 72'' in	1100W	20 m <sup>2</sup>

\* Indicative values for a RT2012 house

### - Live in harmony with your interior design

Very wide choice of images and visuals to really make it your own universe.

## ▮ STRENGTHS

- A unique sensation of well-being thanks to its sun-like radiant heating technology
- A new kind of design space heater on the market with to infinite customization options.
- Green technology, no air movement meaning no dust, microbes, allergies, etc.
- Up to 30% energy savings compared to a standard electric heater.
- All the heaters can be turned into towel dryers. Perfect for the bathroom and the kitchen.

## ▮ DISCREET & ELEGANT

- Its ultra-thin design allow you to keep it discreet and elegant in every room of your household.
- Its innovative radiant technology will allow you to warm your house with zero noise;
- The noble materials that compose your **SIGNATURE SERIES** glass heater by Heatstorm will ensure a clean air with zero smell.

## COLLECTION BATHROOM

*An efficient design heater*

*A heater that offers a unique design with an exceptional heating standard thanks to its aluminum heating film placed in between two tempered glass panels of 0,15 inch each.*

*The Signature Series Heaters by Heatstorm can be turned into a tower drier just by adding stainless steel bars.*

*When only 16" wide, the Signature Series Heaters by Heatstorm will any tiny space in your bathroom.*
