Sun-Like Warmth

Greater Comfort Using Less Energy

Infrared Indoor Heating

Welcome to a cozy world of warmth with our infrared heating solutions

Benefits & Value

- Sun-like warmth
- No ventilation required
- UL-listed for indoor and outdoor use
- No refillable tanks
- Easy to install and inexpensive to operate
- Intuitive & customizable controls
- Lifetime customer support
- Over 90% of input energy is directly converted into radiant heat
- To contrast, traditional gas heaters are often 50% less efficient
- Eco-friendly - emits zero greenhouse gases or odors

Say goodbye to chilly mornings and hello to a warm, energy-efficient home

 Wall mounted Wi-Fi thermostat

Under Desk Heater

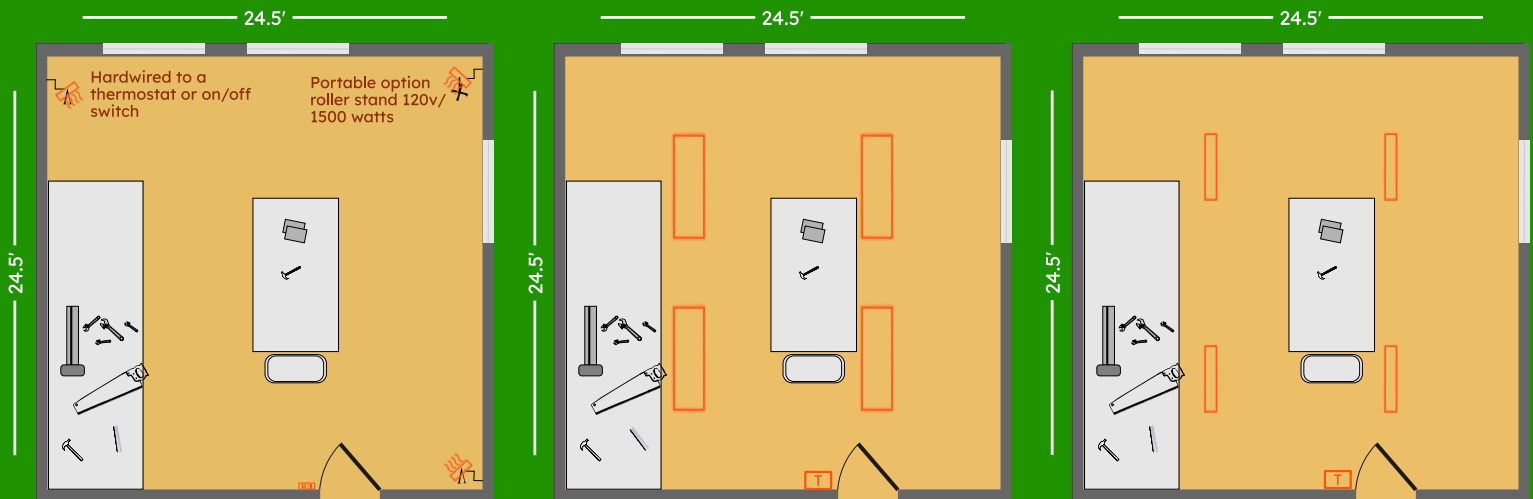

- Mount or free stand
- 170 watts
- Steel Construction

- Zone-controlled heating using infrared hardwired and plug in heaters
- Our system dovetails well with any existing systems including, but not limited to ductless heat pumps, forced air systems, wood/pellet stoves, boilers, etc
- Infrared heating systems can be used for supplemental or primary heat
- Access more usable space by replacing your existing baseboard or wall heaters with our infrared heaters
- Infrared heaters increase home safety as they cannot be blocked by furniture or covered
- Our heaters are much safer than using a space, baseboard, or wall heater

Heating Green Worldwide Projects & Locations

Testimonials

Proven - Professional - Passionate

"I am a DIY'er. Jeff was very helpful and fun to work with designing and sizing my electric garage heating system. Then shipping me excellent electric heaters and controls. Made the experience a joy..."

- **Charles Baarsch**

"Jeff was great to work with and all my clients love their panels. I especially like the ease of retrofitting in spaces without dramatic changes to design or decor."

- **Michael McAuley**

"CB Premier Construction LLC has worked with Heating Green on a couple of different projects now. Jeff is great to work with and the products that have been recommended for our clients have worked out perfectly. We look forward to working with them on many projects in the future!"

- **Amber Mills**

"Such an incredible company with the most amazing product!! Would recommend them to everyone!"

- **Macy Cole**

"A great company to work with that offers ecological alternatives to heating!"

- **Kiffer Brown**

"I purchased the under desk radiant heater and it makes all the difference! My office is located in an older building that is difficult to heat and this keeps me warm and cozy while I'm working at my desk. Thank you Jeff and Heating Green!"

- **Jody Kennedy**

"Amazing customer service and answered all my questions with install etc."

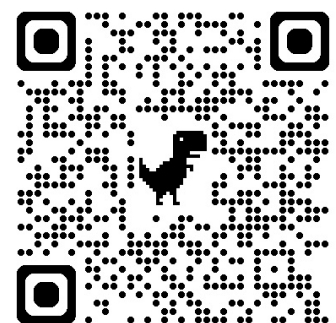

- **Tim Brown**
